Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-2, and 7 are rejected under 35 U.S.C. 102(e) as being anticipated by Wang U.S. Patent 6,523,223. Wang shows all of the claimed subject matter of a foldable joint in Figures 1-12.

Regarding claim 1, an inner-lock foldable joint comprising: two base plates 20 rotatably connected by a hinge, each base plate 20 having a depression 22 and 121; at least one groove 211 disposed along an edge of one of the depressions 22 and 121; at least one latching block 25 moveably mounted in one of the depressions; and a braking mechanism 24 attached to the latching block 25 for driving the latching block into or out of the groove; wherein when the latching block moves into the groove 211, the two base plates are in a latched state, and when the latching block is not in the groove, the two base plates are in an unlatched state.

Regarding claim 2, wherein the latching block 25 has two flanges (each side of rib 252), which are of a matched shape with the groove 211.

Regarding claim 7, wherein the braking mechanism has a lever 31 to enable a user to control the braking mechanism by operating the lever to move the latching block.

Allowable Subject Matter

3. Claims 2-6 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

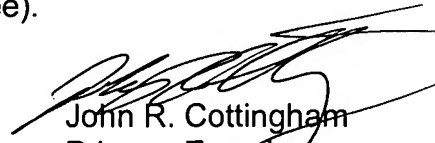

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. McCullough U.S. Patent 3,969,788 and Mayer U.S. Patent 3,879,146 show similar inventions.
